 New in 2022

For more than 30 years, Proludic has been designing, manufacturing and installing playgrounds and sports areas around the world

Our mission

True to our values, we are focused on our mission of creating playgrounds and sports areas where users can thrive, develop their skills and improve their well-being.

We design, manufacture and install products and play spaces offering the highest quality and safety. Our universal, innovative and inclusive solutions are tailored to meet the wide range of needs among children, teenagers and adults.

We also strive to transform play areas into social hubs that promote and enhance community life.

Our values

Experience

Proludic can draw on the operational expertise it has developed since 1988 to provide customers with superior support and guidance in developing and implementing their projects.

Innovation

Proludic harnesses its collective driving force to extend and upgrade its product range to reflect the changing needs of today's generations and tomorrow's world.

Commitment

All our employees share the company's determination to see children thrive, while fostering well-being for everyone and enhancing customer satisfaction.

Proximity

All around the world, local teams are ready to respond and bring a dedicated and professional approach to each playground and sports area project.

Recognised quality

A certified environmental approach

Endorsed compliance with standards

Award-winning designs

Integrated expert knowledge

1

Our in-depth knowledge of children is the driving force for every project

Every day, our teams are focused on leading projects that strengthen their expertise in children's developmental needs by:

- Working alongside **childhood specialists**.
- Gathering insights into the latest **lifestyles** and **trends**.
- **Observing and analysing** how children behave on their own and as part of a group within their educational play environment.
- **Planning to ensure that play experiences promote the development of children's motor, sensory, cognitive, creative and social skills.**

Design: inextricably interwoven into Proludic's DNA

2

Proludic's in-house Research & Development Department is a powerhouse for pioneering innovative ideas that comply with applicable standards.

Our designers are responsible for masterminding leading-edge concepts and product ranges geared towards the expectations of children and adults alike. We also have a long track record in developing bespoke and personalised projects.

- **6 designers and 15 technical engineers.**

3

Integrated manufacturing processes

To better deliver superior efficiency, flexibility and quality, Proludic's manufacturing and distribution functions are based out of the company's head office.

- **60 qualified workers.**
- Ability to work with a wide **variety of materials**, including wood, metal, rope, composites and plastics.
- **Quality control** and testing on materials and equipment.

Production processes are controlled and managed entirely within the company, meaning that Proludic can manufacture custom products and unique designs with greater responsiveness.

Landscape design 4

Your project is unique to us!

Each project starts with an initial encounter. This allows us to get to know you as a client and understand your needs, so we can provide a tailor-made design solution in keeping with your brief.

Our combined knowledge and expertise ensures your needs will be carefully assessed, and that we will provide you with advice to ensure consistency across your play area project in terms of products, location, layout and environment. Following this consultation, we are then able to create the most appropriate project design to achieve a harmonious and attractive result.

- 200 salespeople in the field every day, throughout the world.
- Landscape designers at your service.

5 Installation & Project management

Proludic project manages each playspace project from the time you place your order, through to project completion - and beyond. Our services include:

- Installation of play and sports equipment
- Landscape integration
- General layout works
- Laying safety surfaces
- After-sales service
- Servicing and maintenance

We carry out all our work in line with the project objectives and in accordance with safety requirements.

After-sales service 6

We are here to help, long after your project is installed. If there is anything you need, we will get back to you as quickly as possible.

Our promise?

90% of requests processed within 24 hours
80% of spare parts shipped within 5 working days

Environmental policy

Children are at the heart of all that we do. Across all of our activities, we act to ensure their future by doing what we can to protect the environment.

The company's environmental policy drives us to take action on the sustainable use of natural resources, and in doing so, ensures a better quality of life for future generations.

Sustainable products and services

Proludic has adopted a sustainability strategy focused on the optimised use of resources and the provision of services to support the lifespan of our products. This strategy helps limit our ecological footprint and that of our customers. Through these actions, Proludic commits to the quality and lifetime use of our products:

- Durable, sustainable and ethical materials that are recyclable
- Efficient after-sales service to support long-term product integrity
- Long-term spare parts availability ensuring product reparability
- Extensive guarantees up to 25 years

Proludic selects and uses 100% recyclable materials.

Metal

Steel, stainless steel and aluminium are 100% recyclable (steelworks and refinery plants).

Compact

Compact is 100% recyclable (energy production).

Plastic

All our plastic parts are marked with standard international codes which ensure their traceability and suitability for recycling in the plastic processing industry.

Wood

The plywood and laminated wood are 100% recyclable.

Managing our resources

- Proludic commits to reducing VOCs (Volatile Organic Compounds) by replacing solvent-based paints with water-based paints.
- Our packaging strategy reduces materials, optimises space and minimises transport costs and CO2 emissions.
- We strive to use energy efficiently.

Optimised waste management

We optimise all aspects of waste management at our production facility and during the construction of play areas.

Over 95% of waste is recycled.

Everybody at Proludic is committed to a sustainable development approach

We implement sustainability actions every day, such as:

- Waste sorting
- Reduction of paper use
- Optimised office lighting
- Minimising travel by using video conferencing
- Using reusable cups
- Use of renewable energy

Each Proludic employee does their bit!

Play activities for stimulating interaction between children, to include everybody

At Proludic, inclusion is one of the cornerstones of our philosophy, because we believe that all children should have access to the same play activities and equipment.

What is an inclusive play area?

An inclusive play area is a space featuring an accessible layout and a range of play equipment so that children can **express themselves, play together and progress at their own pace and to the best of their abilities.**

Our inclusive play areas offer products that have been **designed to accommodate various disabilities** (motor, visual, hearing and intellectual impairments, autism, etc.) without ever creating any stigma in how they are used or perceived.

Integrated play area

Inclusive play area designed by Proludic

All types of disability are taken into account

What are the key considerations when designing an inclusive play area?

- **Improve access to equipment** by the presence of a ramp, low floors and safe steps. Offer several easy-access entrances.
- **Use colours, shapes, textures and sounds** to stimulate the senses and promote development.
- Prioritise low-level activities either inside or outside the play equipment to **encourage interaction.**
- **Provide a wide range of play equipment and activities** to meet the needs of many types of ability.
- **Provide simple activities with gradual progression in levels of difficulty** to stimulate children and enable success.
- **Provide equipment and spaces** that allow children to withdraw for **quiet periods.**
- **Create access paths and use appropriate ground markings** to facilitate movement around the play area.

6 GRAPHICS
are available in
our catalogue

Original, innovative and audacious all at the same time, the Grafic Games decorative technique has been developed to personalise all our play structures. This technique allows a project to stand out from the crowd and brings real added value to your playground.

- Proludic's internal teams are experts in using this technique.
- The finish can be applied to **all compact composite and lacquered plywood panels**.
- The **varnish finish** improves the graphics' resistance to graffiti removers.
- The **warranties** are the same as for all HPL compact composite and lacquered plywood panels (25 years).

Bespoke projects, you dream it... we create it

At Proludic, the only thing that we like better than sharing in your dreams is turning them into a reality!

Drawing strength from our expertise in design, engineering, manufacturing and installation, we combine creative flair, high standards to create unique and spectacular designs.

We relish the challenge of breaking with convention, starting with a blank canvas and breathing life into all our customers' ideas.

Our creations come to life in the most varied play environments with larger, taller, themed and completely personalised products.

Identify our custom products and designs in this catalogue with this pictogram.

La Rochelle France

Valin Square is a symbolic location in La Rochelle's Old Port.

The playground is located halfway between the city and the coast. The design is influenced by the "relationship between the maritime world and children".

All-Russian Exhibition Centre

Moscow - Russia

The playground has been fully personalised in the colours of Lukoil, Russia's largest oil producer.

All the items of play equipment are related to the activities involved in producing, treating and the use of oil.

Imantas

Riga - Latvia

This playground reflects the city's international airport, which is located nearby.

The area is designed around a control tower and an aeroplane.

Vestertorv Square

Kolding - Denmark

This impressive structure, designed in Robinia wood, (with an inner metal framework), represents an origami in the shape of a cloud.

It adds an architectural, poetic and refined touch to this square, located in the heart of a city where nature is omnipresent.

MULTIPLAY EQUIPMENT

- Multiplay equipment is designed to make children move without them even realising!

For young children: the variety of play elements and how they're incorporated into the structures are designed to challenge their motor skills. At the same time, they encourage their curiosity and sense of discovery. For older children: there's an opportunity to put themselves to the test - to slide, climb, turn and cross - to go a little faster and take a few risks.

Multiplay equipment is all about getting children to be active. But it also has an important role in nurturing fun, joyful interactions between children by creating a place for a group of children to play together.

Diabolo is an essential component for any play area. With platforms ranging in height from 60cm to 177cm, and with many diverse play elements, the Diabolo range is suitable for children from 6 months to 12 years old.

The modular nature of this range allows for multiple combinations. These can be adapted to a specific age range, or used to encourage interaction between children with different capabilities due to age differences or ability.

The classic 'must-have' play features are included on each structural element. Varied and complex on more elaborate combinations, these features offer children more opportunities to discover, be challenged and have fun.

Diabolo is available in two colour palettes: "Zingy" (yellow, orange and green) and "Pastel and Wood" (lagoon blue, apple green and oak).

WINNER

A range designed for the very young

The Diabolo Baby range is dedicated to early childhood. The structures are designed to encourage early learning, guiding young children through a sequence of activities which stimulate their motor and fine-motor skills, and support role-play and interaction with others.

All activities take place at ground level or at a maximum height of 60cm. All play elements are varied, relevant, adaptable and modular.

NURSERY
YOUNG CHILDREN
MOTOR DEVELOPMENT
LEARNING
EARLY LEARNING

Diabolo Baby, a range meeting the developmental and well-being needs of children from 6 months to 2 years:

Helping young children discover new motor skills

On all fours, children move forward in a confined space.

Moving forward on a slope, holding narrow shapes that are raised and spaced apart.

Moving in an area surrounded by empty space.

Going underneath.

Understanding obstacles

Developing their sensorimotor and psychomotor skills

Encouraging fine motor skills through the movement of shapes along a defined path.

Exploring how different objects look: colours, transparency, distorted reflections, light/dark contrasts.

Developing awareness of shapes (square, round, triangle)

Resolving play tasks using the manipulation of simple shapes that use thought, memory, learning and reasoning.

Experiencing different textures (raised diamond shapes, grass effect, rough surfaces).

Supporting their social development

Learning to play and interact with others.

Developing their imagination through role play

Encouraging children to help each other.

Climbing, sliding, crawling, sharing, inventing... GROWING!

INSPIRATIONS

The Vivarea range provides a variety of interesting and stimulating play activities for children aged 2 to 8 years, in a style that captures the sunny European climate.

The structures take their inspiration from Mediterranean villages nestled into the mountains, with varied levels, spaces, shapes and heights.

Semicircular terraces, narrow, straight walkways, clever variations in platform levels, closed or open playhouses; the equipment can be used by large numbers of children and it provides them with lots of activities to enhance learning and motor skills. The equipment range comes in a variety of combinations, with key opportunities for play and development, providing suitable options for small or larger play areas alike.

The Origin' range of play equipment recreates the very essence of what nature has to offer: a forest walk, crossing a stream over stepping-stones or an uprooted tree trunk, a playhouse made of fallen branches, an adventure trail that includes climbing, sliding and discovering.

Here, children play in a setting inspired by nature. Their senses are awakened and stimulated by the look and feel of the Robinia wood play structures.

The Kanopé range, with its structures resembling wild grasses or tree trunks bent by the wind, invites children to venture into nature.

Children from two years of age can navigate a pathway that's horizontal or vertical, steep or moving. They can climb in all directions, clambering up and down numerous uniquely-shaped rope structures. They can pretend to be acrobats or tightrope walkers. Or they can slide down a rope, a traditional slide, or take the plunge using the Speed Slide.

All play features fit with Kanopé's signature design – inspired by nature, with a contemporary, streamlined look.

The range is available in two styles: evergreen and oak effect.

Since its introduction, the Kanopé range has continually evolved, offering new and ever more innovative play features.

2017

The range provides a new aesthetic environment, inspired by nature in a contemporary way.

Kanopé, the adventure continues under the treetops

2018

Kanopé reaches for the sky with its majestic towers, aerial and luminous, of up to 8m high.

Kanopé, the adventure continues... higher, further... to other worlds

2021

Kanopé strengthens its range with new playful and inclusive structures designed for all age groups from the very young to older children: **Ka'Yop Trees**.

Kanopé, the adventure is played out inside, outside - everywhere

Proludic, tell us the story of Ka'Yop!

Once upon a time...

In the Proludic Research & Development laboratory, our designers decided to create a new tree in the Kanopé family... Since Kanopé is in blossom all year round, they extracted a tiny seed, studied it, removed its outer shell, transformed it, enriched it, then decided to plant it...

A few months later, watered with reflection, consideration and consultation... enhanced through trials and tests... the tiny seed awoke from dormancy, germinated, emerged from the ground and grew into...

Ka'Yop.

The different varieties of Ka'Yop trees:

Ka'Yop Essential,
Ka'Yop Dynamic,
Ka'Yop Inclusive,
Maxi Ka'Yop,
Ka'Yop Spiral

Ka'Yop Maxima

KA'YOP

FULL OF SECRETS INSIDE, OUTSIDE - EVERYWHERE

Ka'Yop is an enchanted tree that will delight both children and teens with its wealth of exciting play activities.

The lower part contains collaborative and inclusive play elements. Play panels, sound-play, climbing nets, moving seats and rotating play features are spread over the 4 structures.

The upper part, with its lush green foliage, transforms the tree into a leafy cocoon, containing a wide variety of motor and sensory activities.

KANOPE - THE TALL TOWERS

MULTIPLAY EQUIPMENT

These majestic, ethereal tall towers, as high as 8 metres, will make an impact in any environment.

Children can climb a rope staircase to reach asymmetric play houses perched high at the top of the towers - giving each child a commanding view and a special space above the action.

A large 'Kayak' spiral slide guarantees a thrilling ride all the way back down.

KANOPE

MULTIPLAY EQUIPMENT

Designed like a town, the play area provides a meeting point for children aged 2 to 12 years who want to test and develop their motor skills. This provides opportunities for children who are eager to find excitement, adventure and other children to talk to.

The style of the Biibox range is contemporary, with a look that combines flowing curves utilising predominantly metal materials, highlighted by brightly coloured panels.

Its modular design allows a solution to be found for all requirements and enables it to fit effortlessly into the surrounding environment.

INSPIRATIONS

The Ixo range speaks the language of pre-teens.

No longer satisfied with playing the same games as younger children, pre-teen boys and girls want to be challenged - to test their strength, to prove themselves in the eyes of others, to make their own rules.

Inspired by modern architecture, the Ixo range is contemporary in style, with clean lines and transparent structures.

The range is available in two styles - choose from metal or wooden posts - to create a more urban or more natural effect.

THEMED EQUIPMENT

Our themed play equipment fires up the imagination. Children can dream of being adventurers on boats, trains, rockets and fire engines. They can imagine lions and dinosaurs. They can create their own world around our playspace themes: Adventure, Metropolis, City, Aquatica and Medieval.

They can express themselves freely, stimulated by the many details and unique elements on every piece of equipment.

ADVENTURE

THEMED EQUIPMENT

Our Adventure-themed equipment transports children into the leafy undergrowth of the jungle. Whether climbing aboard a jeep or carefully crossing the suspension bridge, young explorers can go in search of a secret temple and come face-to-face with wild animals along the way.

Each structure is equipped with a range of play elements that challenge and stimulate the senses.

The use of an orange, brown and green colour palette, emphasises the tropical forest theme.

ADVENTURE THEMED EQUIPMENT

**CRAFIC
GAMES**

**CRAFIC
GAMES**

The Metropolis range welcomes children to a world that draws its inspiration from the books of science fiction writers such as Jules Verne and H.G. Wells. The play structures are weird and wonderful machines, each complete with unique design details and imaginative play features.

The combination of stainless steel posts and copper coloured panels reinforce the futuristic look of the equipment.

To set sail across the stormy seas and shipwreck on a desert island. To drop anchor and go fishing with friends.

Children can create any number of adventures around our water-themed playgrounds. Each structure in the Aquatica range is equipped with numerous play elements designed to develop motor and fine motor skills, and stimulate the imagination.

MEDIEVAL

THEMED EQUIPMENT

The Medieval theme transports children to a world of knights and chivalry.

Symbols from this period such as turrets, shields and bridges adorn the play equipment. When combined with children's imagination the equipment becomes the starting point for a host of fun adventures. The numerous play panels add to the theme and test children's problem-solving skills.

MOVING EQUIPMENT

Popular with younger and older children alike, moving play equipment provides a key focus of activity, offering a wide variety of sensations: swinging and balancing, rocking and gliding, moving through space, fast and slow.

Children will love the dynamic experience of our cableways, spring motion and rotating equipment.

Springers are an essential element of play spaces for young children. They enhance a toddler's sense of balance and help them coordinate their movements, while giving older children great fun as they swing wildly.

Springers are equipped with suitably-sized footrests and handles, so they're ergonomically designed for maximum user comfort and safety. Their playful and colourful shapes are based on familiar themes, designed to stimulate a child's imagination.

ROTATING EQUIPMENT

MOVING EQUIPMENT

Children of all ages love rotating equipment.

Younger children gradually learn to enjoy the exhilaration of speed on roundabouts. As children get older and more self-assured, they can test their balance and push their limits on more challenging structures that combine rotation and swinging.

Cableways offer an essential, fun aspect to active play areas for pre-teens and teenagers. Not only will they enjoy the thrill of gliding through space, cableways are a great way to teach children of all ages to cooperate, take turns and share.

Young people can both challenge themselves and compete with others. They can develop their own technique and build strength and agility while they play.

TRADITIONAL PLAY EQUIPMENT

No playground would be complete without certain classic play items like playhouses, swings and slides. Some are great places for children to play alone or with others. Other play elements offer heightened sensations that go with sliding and swinging.

Whether used as standalone items or to complement multiplay structures, they're fundamental to any play area design.

PLAYHOUSES

TRADITIONAL PLAY EQUIPMENT

The playhouses provide wonderful places for young children to play or socialise.

Their shapes, style and cleverly designed accessories take young children into an imaginary world where they can pretend be shop keepers, teachers or chefs...

SWINGS

TRADITIONAL PLAY EQUIPMENT

There's nothing like the thrill of flying through the air on a swing! Enjoyed by children for generations, swings are a traditional play item and a key element in any playground.

The simple enjoyment of swinging remains the same - but there are some things that have changed! Swing equipment now includes: swinging while lying in a pod, a hexagon frame with swings for six, and a safe wraparound cradle swing for toddlers.

SWINGS

TRADITIONAL PLAY EQUIPMENT

1 Swing chains.
Galvanised steel overmoulded with rubber (pod swing)

3 Fixed rotation system.
Fitted with bearings.

5 PVC sliding rings prevent wear on the metal parts (pod swing)

2 The stainless steel rotation system enables swinging in both directions. A safety chain strengthens the pod support (pod swing)

4 Anti-wrap round rotation system. Made of polyamide parts and stainless steel fixings.

6  The **swing seat** is made of a stainless steel frame with a rubber seat pad incorporating a stainless steel cable. The swing chains are made of stainless steel.

SLIDES

TRADITIONAL PLAY EQUIPMENT

Forever popular, slides are an integral element of a child's world.

For younger children, there are wide steps that provide a stable base for safe access, while older boys and girls climb up a ladder.

Straight or wavy slides, stainless steel tubular structures, polyethylene kayak slides – the variety of shapes, lengths and materials provide multiple solutions for developing a play area and adapting it to any type of environment.

CLIMBING & BALANCING EQUIPMENT

Balancing and climbing equipment encourages children to test their agility, spatial confidence and motor coordination.

The wide variety of equipment, which includes short fitness trails, pyramids, trampolines, climbing walls and climbing bars provides differing levels of difficulty appropriate to children's ages and abilities.

TRAILS

CLIMBING & BALANCING EQUIPMENT

Trails enable sequences of movements that will help children develop their motor capabilities. Crossing a beam, moving forward on unstable steps, climbing, crawling, hanging... children learn to manage their body in space, acquire better movement coordination and develop their concentration.

Trails also offer varying levels of difficulty, encouraging children to take risks and push themselves beyond their limits.

TRAMPOLINES

CLIMBING & BALANCING EQUIPMENT

Trampolines give children wings and are the ultimate in fun!

Trampolines are simple to use and available to children aged 3 and above. They develop motor skills, coordination, balance and muscle strength. In the air, children become aware of how their body feels in space and improve their posture.

Trampolines rightly belong in any inclusive play area. Ground-level trampolines are protected by a frame with rounded edges and ensure easy access to the centre for children in wheelchairs with a helping hand from a carer or playmate, so that they too can gently experience the sensation of bouncing.

The steady bouncing motion of the trampoline can have a calming effect on hyperactive and autistic children.

ROPE STRUCTURES

CLIMBING & BALANCING EQUIPMENT

Rope structures continually reinvent adventure trails.

Designed in 3D, they allow children to take complete ownership of the space, making use of both the periphery and inside sections of the equipment. Crossing requires concentration and good hand-foot coordination.

Young acrobats must also show a good sense of balance to best manage the instability of the ropes and, in some cases, the suspended stepping stones at the centre of the structures.

By going higher on the pyramids, children expand their perception of space.

CLIMBING STRUCTURES

CLIMBING & BALANCING EQUIPMENT

Climbing structures enable children and teens to test out their balance and agility and demonstrate coordination of movement.

Nets, climbing walls, ladders, horizontal bars, a 4m high pole... the equipment is varied and presents different levels of difficulty, sometimes technical, but has something appropriate for all children from ages 2 and above.

THE VERTICAL WORLD

CLIMBING & BALANCING EQUIPMENT

Designed along the same lines as Parkour, which uses obstacles from the urban environment, The Vertical World challenges children to climb, jump and develop their physical skills in exhilarating, dynamic ways.

Horizontal, vertical and sloping climbing structures are designed to be both technically challenging and enjoyable for all users. Climbers use their agility and strength to manoeuvre through openings from one side to another, from one module to another.

Connecting elements like nets, climbing tubes and bridges, can be used to lengthen the climbing course. By adding more obstacles, you can modify the level of difficulty and challenge – enhancing the play value and dialling up the fun!

THE SUSPENDED WORLD

CLIMBING & BALANCING EQUIPMENT

The Suspended World challenges children to move their bodies and explore new ways of playing in a 3D space above the ground.

Original play elements give children the opportunity to climb and balance, building strength and flexibility, as they explore an airborne trail in fun, acrobatic and original ways.

The various play elements are all connected to a central pyramid net. Children can make their way from one play structure to another. Using the arch, they use their strength to swing and grasp the next rung, to reach the other side. Testing their balance, they move across the swaying footbridge or the 4-metre-long Aero-glide. In between, they catch their breath at strategically placed 'nests'.

EDUCATIONAL AND SENSORY PLAY ACTIVITIES

Educational and sensory play stimulates children's minds, improves their cognitive capacities and encourages communication. It can even facilitate children to help each other solve problems and overcome challenges together.

Play panels develop concentration and observation through play. Playing with sand and water stimulates the senses, increases motor skills and inspires creativity in children of all ages. Musical play activities help to activate children's hearing. Interactive play activities arouse keen observation and a quick response.

All of these play elements help to socialise children through play.

PLAY PANELS & AUDIO AND MUSICAL PLAY

EDUCATIONAL AND SENSORY PLAY ACTIVITIES

Engaging and fun, children enjoy using interactive play panels like Sensory Flowers and Talktubes.

Understanding play activity instructions on the panels help develop their observation and analysis skills. Performing the activities demands concentration and thought. It helps develop hand-eye coordination and strengthens their ability to plan.

Musical play activities stimulate their auditory perception and helps develop creativity and encourage interaction with other children.

SAND PLAY, WATER PLAY AND GARDENING

EDUCATIONAL AND SENSORY PLAY ACTIVITIES

The handling of water, sand and soil is a great source of sensory experiences. Children enjoy themselves working with these materials whose properties allow a multitude of experiments. They refine control and coordination of hand movements. They gain awareness of the concepts of shape, state, weight, volume... and learn to understand cause and effect relationships.

Gardening activities also help them understand how they can interact with nature and understand the notion of life growing. In addition, gardening can also help develop children's sense of smell.

INTERACTIVE PLAY EXPERIENCES

EDUCATIONAL AND SENSORY PLAY ACTIVITIES

Interactive play experiences combine physical and intellectual activities and technology. Designed for a connected generation, these play activities interweave sound, light and action. Visual and audio stimuli call upon juniors' cognitive functions, requiring them to use memory, recognition, speed and responsiveness.

Group challenges also help develop team spirit, cooperation and cohesion in children.

SPORT FOR ALL

Proludic has developed a strategy to overcome most of the barriers that deter people from taking part in sports by emphasising the fun, pleasure and well-being that fitness activities can bring.

Proludic designs inclusive and mixed-gender sports & fitness areas that cater to every generation. They promote an active lifestyle, regardless of the user's age, abilities, level and objectives. Proludic's designs also help develop motor skills while maximising fun in an outdoor environment that is openly available at all times.

Sports & fitness areas are designed so that beginners can start exercising the right way, while allowing experienced users to regularly work out and up their game. Each zone offers a range of specific and complementary equipment, including quick and easy activities for occasional users, as well as progressive and complex activities for hard-training athletes. Exercises enable users to achieve their personal goals, whether improving their stamina, increasing their flexibility or developing their muscular strength, with varying levels of intensity that will appeal to everyone.

Proludic also provides a broad selection of complementary and modular equipment to accommodate different site layouts.

A harmonious choice of products is the key to an intelligently thought-out sports area that will blend seamlessly into the surrounding environment. When installed near a playground sports and fitness areas often complement one another.

Each sports & fitness zone presented below meets the specific needs of the category of users for which it has been designed, thereby guaranteeing an enjoyable and productive experience.

CARDIO-TRAINING AREA

NEW

Ninja trails are sports & fitness obstacle courses for children from six years upwards and teenagers. Offering an infinite combination of equipment, they can be used to develop:

- 
- > Strength
 - > Endurance
 - > Reflection
 - > Agility
 - > Speed

→ An invitation for users to come back and push their limits.

The **Stopwatch module** lets users throw down the gauntlet to their friends.

3 combinations are available as standard to fit the available space:

		Difficulty level
M		Difficulty level
L		Difficulty level
XXL		Difficulty level

The wealth of components with their modular designs are the ideal solution for creating the perfect trail to suit your specific needs. The difficulty levels, age ranges and dimensions can be selected or mixed to create a truly multi-generational design.

- > Tackling the unknown
- > Challenges
- > Clearing obstacles
- > Pushing personal boundaries

MULTI USE GAMES AREAS

SPORT

Favoured by children and teens for practising all kinds of ball sports, Multisports areas are currently very popular. Football, basketball, handball, volleyball, hockey, badminton... now it's possible to play all these team sports in the same space.

High quality materials

Aluminium fence panels, collars and flanges

- Corrosion resistance
- Highly robust

Galvanised steel posts

- Strength
- Long life

Reinforced fence panels

- ⊕ 3 horizontal tubes, Ø 40mm and thickness 3mm
- ⊕ Filled with vertical tubes, Ø 20mm and thickness 2mm
- ⊕ The vertical tubes are inserted into the horizontal tubes to improve resistance to impacts from balls

Noise-cancelling design*

- ⊕ Aluminium has been chosen for our fence panels for its acoustic absorption properties
- ⊕ The central horizontal tube improves the panel's rigidity and stability
- ⊕ The collar fixing system minimises panel vibrations

Drill-free collar clamping system

- Allows flanges to be adjusted by 360° and components to be angled with millimetre precision
- Can be used to fix up to four components (fences, accessories, options, etc.)

*The sound level during use has been measured by independent certification body TÜV, which confirmed that the maximum sound level with 'A' frequency weighting (LAFmax) was lower than the threshold values.

*Build your very own
bespoke multi-use
games area*

1 Choose the dimensions and heights

- > Length and width of the games area
- > 3 heights available: 1m, 2m and 3m
- > Square or angled corners

2 Define the access points

- > Inclusive access at the goal ends
- > Inclusive access on the sides
- > Gates on the sides
- > Anti-cycle chicane

3 Choose your colours

- > Fence panels according to the RAL colour chart
- > Collars available in black and green

4 Define the surfacing and floor markings

- > Unfinished or painted asphalt
- > Artificial grass
- > Markings: football, basketball, volleyball, handball, etc.

5 Add your sports & fitness accessories and options

Ball stop netting	Height-adjustable side or rear basketball hoop	Volley-ball / tennis nets	Personalised colour	Mini goal	Customisable decorative panels with prints (custom printings or engravings)	Cycle rack	Changing room coat hanger
			 RAL				
Tennis / football skills training panel	Scoreboard	Goal ball stop fencing	Selfie support and sound amplifier for smartphones	Vertical jump activity	Shooting target	Side seats	Seat canopy

*« Designed by experts...
... designed for everyone »*

The design for this range draws its inspiration from the partnership between Proludic and the World Street Workout and Calisthenics Federation.

By working alongside a best-in-class partner and harnessing the expertise of top-level athletes, Proludic has designed an array of high-performance equipment that is clearly geared towards the needs of all amateur and professional users.

The structures available as standard have been specifically engineered to address the challenges facing today's society by creating a Street Workout zone for a mixed-gender, multi-generational and inclusive target group.

You can also build your own bespoke structure using the 23 exercise modules available.

Get in touch to design your personalised structure!

"One of the main objectives of the WSWCF is the creation of new street workout training facilities of the highest standard worldwide. Facilities that are inclusive and suitable for people of all ages, genders and abilities.

Together with Proludic, we have designed the new "Street Workout" range. It's innovative, inclusive design sets a new benchmark for street workout training facilities."

Rolands Kikors, Vice-President and Member of the Educational Board of the World Street Workout and Calisthenics Federation.

Check out the partnership between Proludic and WSWCF, and the benefits for Street Workout fans at proludic.com

Technical aspects

The dimensions and diameters of the Street Workout range comply with WSWCF recommendations. Equipment is certified for use in official competitions.

1 Hanging bars feature variable spacings, so that exercises can be tailored to each user's composition (women, men, children or teenagers).

3 Comfortable bars offering a secure grip are vitally important for Street Workouts. Proludic uses an epoxy coating to guarantee adherence and safety during use.

2 Modules specifically designed for individuals with reduced mobility can be used to create inclusive Street Workout areas.

The 23 exercise modules offer an infinite number of combinations.

Combine your modules to match the needs of your users, whether multi-generational, inclusive, mixed-gender or professional. Modules can also be associated with multi-use games areas to create consistent and enhanced multi-activity areas.

The Urbanix outdoor fitness range includes real gym equipment designed to work different muscle groups and provide genuine cardiovascular benefits. The exclusive patented hydraulic piston technology means the equipment can be adjusted to suit the user's physical abilities. This unique feature enables people of all abilities to exercise at a pace suitable for them and to progress the difficulty of each activity as their fitness improves.

Adaptable equipment

- Patented bi-directional hydraulic piston
- Adjusts to 8 position levels
- Safe-stop
- Magnetic resistance for the rechargeable products

Advantages

- ⊕ Bi-directional or uni-directional resistance depending on muscle groups worked
- ⊕ Safe use
- ⊕ Constant load/resistance
- ⊕ Measurable progress
- ⊕ Encourages regular use

High quality materials

- Metal posts
- PolySafe™ seats
- EPDM elastomer handles

Advantages

- ⊕ User comfort
- ⊕ Weather resistant
- ⊕ Long life
- ⊕ Environmentally friendly
- ⊕ Minimal maintenance
- ⊕ Anti-corrosion
- ⊕ User satisfaction

Integrated charging system

- CE certified
- Low voltage to protect batteries
- USB port
- LED lights
- Weatherproof

Benefits

- ⊕ Environmentally friendly
- ⊕ User comfort
- ⊕ Outdoor resistance

Painted metal posts

Each focusing on a specific exercise, Vitality Stations offer activities such as rowing, running trainer, exercise bike, wall bars etc. Each item of equipment has a precise function, with the emphasis more on endurance than resistance.

A specific design

- Ergonomic design
- Compact multi-sport stations
- Combines with play area equipment

Advantages

- ⊕ User comfort
- ⊕ Ideal for families
- ⊕ Cross-generation, children to adults
- ⊕ Suitable for all physical abilities

A design encouraging sports practice

- High quality materials
- Specific signage
- Standard sports activities

Advantages

- ⊕ Durable
- ⊕ User guidance
- ⊕ Easy to use

Fitness Trails offer users a sequence of exercises such as hurdles, workouts on horizontal bars or hanging ladders, stretching on wall bars, gaining speed in slalom turns etc., which when sequenced provides a complete workout for several muscle groups.

Designed for a wide range of people

- Progressive circuit
- Age-adjustable
- Suitable for all physical abilities

Advantages

- ⊕ Making people want to exercise more
- ⊕ Creating a space for diversity and sharing
- ⊕ Encouraging regular exercise

User guidance

Specific signage for each item of equipment

Advantage

- ⊕ Adapt your sports activity to the equipment

High quality materials

- Galvanised steel posts
- Compact panels
- Stainless steel tubes
- Dibond signage

Advantages

- ⊕ Strong
- ⊕ Long life
- ⊕ Minimal maintenance
- ⊕ Easy to install

DESIGNS

Leisure spaces are places to relax for all age groups, users and accompanying adults, and successful design is achieved through harmony between play equipment, furniture and environment.

Designing a play area, therefore, involves much more thought than just play aspects. Allowing children, the freedom to play in a clean, hazard-free location protected from paths and roads is paramount. However, providing parents, carers and users the ability to rest, have a snack and chat also contribute to a successful leisure space.

Classic or contemporary in design, we have furniture suitable for every project setting, which will blend into any environment seamlessly. Our signs are practical, aesthetic and fun, providing information for play area users. Text can vary depending on where the signs are installed.

TECHNICAL SERVICES

Choice of materials	293
Our guarantees	304

OUR COLOURED PANELS

Compact composite

Our compact composite panels are 13mm thick, and they are made up of softwood fibre (70%) and phenolic binder (30%). They show high levels of dimensional stability over long periods.

The material is unaffected by exposure to major temperature variations, guaranteeing the durability and solidity of the assembled elements. It is a versatile material that is not affected by contact with damp or abrasion.

The coloured surfaces are obtained using pigmented resins that provide good levels of resistance to ultraviolet radiation and aggressive cleaning products.

A range of colours has been specially developed for Proludic, enabling the company to highlight the originality of the equipment and its play aspects.

The platforms are made from a textured and non-slip compact material (HPL), 12.5mm thick.

OUR LACQUERED PANELS

Plywood

Plywood is made from thin sheets of wood that are bonded together, crossing the layers to counteract the wood's natural movements and produce a **rigid and durable product**.

Birch is used for our 21mm plywood panels due to the quality and strength it provides.

Plywood is stable against moisture and therefore ideal for outdoor use in varied climates.

The colours enhance aesthetic appeal and are applied by electrostatic spraying of two-component polyurethane lacquer that is free of heavy metals. It is **resistant to potentially aggressive chemicals such as anti-graffiti cleaning products**.

The polyurethane lacquer also protects the plywood **from damage by ultraviolet radiation**.

OUR TIMBER POSTS

Laminated wood

Laminated wood is made up of layers of solid wood (often Fir or Scots pine) glued together. **It is a very strong material and ideal for posts that have to carry larger loads.**

Its qualities of resistance to dampness and pollution **reduce the maintenance costs of the structures and ensure their durability.**

Durability is further enhanced thanks to:

- Autoclave treatment of the laminated wood that provides in-depth protection from fungi, insects and termites.
- A surface coating that makes the wood waterproof and protects it from UV radiation.

The timber is free of defects (knots or splits) because they are identified and removed during the cutting work on the laminated strips. It is also **free of splinters**, which eliminates the risk of injury and is pleasant to touch.

OUR METAL POSTS, TUBES AND PANELS

Our galvanised steel and painted galvanised steel posts

Our metal posts are made of 2.5mm thick galvanised steel to ensure the requirements for **robustness and safety of play structures**.

The posts provide a **guarantee of longevity** under widely varying climatic conditions thanks to the steel galvanisation process. The application of a **polyester powder coating that is resistant to UV radiation and temperature variations** provides further protection.

Proludic has developed its own **galvanised steel posts**. Their round shape and fluted aspect form an effective anti-graffiti surface. The two toned grain finish reduces the appearance of scratches and ensures the aesthetic integrity of the posts.

Our stainless tubes

Stainless steel is a material with **high mechanical strength**.

Our stainless steel tubes stand up to graffiti, bad weather and urban pollution; **they require very little maintenance and are also resistant to even the most aggressive solvents**.

Our painted aluminium panels

Aluminium is **durable and strong**, making it suitable for many applications. The natural formation of a surface oxide layer enhances its **resistance to corrosion**.

Application on aluminium of a **coat of polyester epoxy paint** provides high levels of resistance to UV radiation and temperature variations, **ensuring long equipment life in diverse environments**.

OUR PLASTIC PARTS, ROPES AND FIXINGS

Our plastic parts

Injected polyamide

Filled polyamide

Polyamide

Proludic selects the various types of plastic based on their properties and intended purpose.

Our plastic parts are non-toxic and resistant to wear, impact, climatic variations and many chemicals. They ensure durability and long life of our play equipment.

All our plastic parts are marked with standard international abbreviations, which ensure their **traceability** and **recycling**.

Our ropes

Our ropes are made of corrosion resistant galvanised steel wire cable strands covered with polyester. **The multi-stranded wire cables remain flexible whilst resisting distortion, and withstand heavy loads.**

The strong and durable polyester covering ensures **user comfort and protection**.

Our fixings

Our fixings are made of stainless steel to **ensure excellent robustness of our assemblies and resistance to wear, corrosion and climatic variations.**

All fixing components are protected by anti-vandal polyamide caps.

OUR MECHANICAL SYSTEMS

Our experience has shown that our products are subjected to extreme stress.

This has led us to develop specific parts to guarantee an optimum level of comfort, durability and strength.

The in-house systems we have developed ensure the reliability of our products while preventing wear, distortion and breakage of mechanical parts.

HERE ARE SOME EXAMPLES:

Springs

The support bracket is an exclusive part patented by Proludic. Made from filled polyamide, it provides exceptional resistance, safety and durability to the system whilst being aesthetically pleasing.

Swings

The seat mounting brackets are designed to withstand heavy loads. They are made from stainless steel wire and are gently rounded in shape to ensure user safety.

PVC sliding rings limit wear to metal parts caused by swinging movements over time, and extend the product life.

Rotation systems

The components used in our rotation systems are selected for their mechanical qualities and guarantee the reliability and robustness of the equipment.

Encased or inserted into connecting parts, our rotation systems are both waterproof and aesthetic.

Guarantees

25, 10, 5 and 2 years

Proludic is committed to the quality and durability of its products.

In addition to using carefully selected materials and applying the highest manufacturing standards, Proludic provides extensive guarantees.

Our guarantees:

25 years for any structural failure of sport or play products due to a material or manufacturing failure of:

- Panels (lacquered plywood / coloured compact / polyethylene)
- Posts and supporting structures (painted galvanised steel, galvanised steel, stainless steel)
- Stainless steel tubes

10 years for any structural failure of sport or play products due to a material or manufacturing failure of:

- Metal components (with the exception of springs, moving or mechanical parts and fixings)
- High density plastic parts (with the exception of moving or mechanical parts)
- Non-slip plywood and compact panels
- Posts (timber)
- Robinia wood planks

5 years for any structural failure of sport or play products due to a material or manufacturing failure of:

- Springs and mechanical systems
- Moulded or rotary moulded plastic parts (with the exception of moving parts)
- Metal crimps and rope assemblies

2 years for any defect or manufacturing fault of component parts.

The colours reproduced in this brochure may not be true to life, Proludic reserves the right to change specifications and make product improvements to any of our products at any time without notice. Information in this brochure was correct at the time of printing.

While every effort has been made to ensure the accuracy of information,

Proludic cannot accept any responsibility for any errors or omissions and this brochure does not form part of any contract.
